WORK EXPERIENCE

Freelance Web Developer
2024 - current

- I specialize in creating responsive and interactive user interfaces for websites and applications using HTML, CSS, and JavaScript
- My experience includes integrating interfaces with backend APIs to display dynamic data seamlessly on the page
- I focus on performance optimization by improving load times, implementing lazy loading, and refining code to boost site speed
- Ensuring cross-device and cross-browser compatibility is a priority, so designs are consistently responsive across both mobile and desktop
- I also work with animations and interactive elements, adding features like pop-ups, sliders, and other dynamic components to enhance user experience
- I have experience in customizing and updating live projects, making modifications and adding new features based on client needs

EDUCATION

Higher technical education, Specialist Degree.
2016 - 2024

I have been studying in a higher education institution for 5 years. My speciality is engineering. After graduation, I started to study web development. I did it in my spare time. I studied materials both on the Internet and in the school of additional education.
